

BLANK GUNS

Kimar®

established in 1992, is the brand of the **Chiappa Firearms** group that produces blank/signal pistols and revolvers front or top firing, 8 mm, 9 mm or .380 PAK calibre. Kimar blank replicas are specifically produced not to be transformed into real firearms at all. They function like real guns, with slide action and ejection of cartridges during shooting, but the barrel is completely or partially closed (according to the local laws). Chiappa Firearms' blank/signal pistols and revolvers are perfect for collectors, prop houses or anyone who appreciates classic handguns when law or circumstances do not permit functional firearms. Patterned after some of the most classic handguns designs, including the **1911, Beretta 92, Cz 75, Colt Python, 1875 SAA, Derringer and others**, are precisely CNC manufactured from metal and finished to look like the originals.
